

BOSTON VISIT TO LAUNCH TECH BOSTON ADVOCATES JULY 2024

I joined Roy Vella, Bob Allard and Dan Allard, the co-leads of Tech Boston Advocates, to launch the 38th group in the Global Tech Advocates community on 1st July.

Roy, Bob and Dan kicked off the event, which took place at the Sam Adams Tap Room in Downtown Boston next to the iconic Faneuil Hall. In addition to Roy, Bob and Dan, we also heard from:

Dave Burwick, former CEO of Boston Beer Company and host of the event

Alex Cheung, Director of Venture Café Cambridge and former Community Leader at Cambridge Innovation Center

Julia Lee, former Harvard Professor and Chief Innovation Officer, TIESdatBIND

We were joined by around 40 new 'Founding Advocates' of Tech Boston Advocates in the room with over 60 more to be added who could not join the event in person. Great to see this latest group added to GTA and congratulations to Roy, Bob and Dan.

The group will focus on multiple 'tech verticals', including healthtech/medtech/biotech as this is one of the key strengths of the Boston tech ecosystem. Although primarily focused on Boston, the group aims to be inclusive of various tech hubs across the New England region.
